

QUICK TURN PROTOTYPE PROGRAM

Assurance Manufacturing Inc. has recently established a quick turn prototype program to provide sheet metal fabrications, chassis, enclosures, stampings and assemblies in a **3 to 7 day time frame**. This service will be provided to Design Engineers, Project Managers and Purchasing Agents in the OEM market place.

The process for the quick turn will begin when CAD files are delivered to Assurance Mfg. in several different formats. Acceptable CAD files include SolidWorks, Pro-E and AutoCAD delivered electronically to Assurance Manufacturing customer service. Due to the capability of creating all tooling in house the prototype process can be accelerated vs. typical sheet metal fabrication environments.

The time frame for delivery will be established by the complexity of the required parts and material availability. Assurance Manufacturing Customer Service personnel will respond within 24 hours with a quote, and delivery information to help facilitate the process for quick turn around.

-
- Time Frame Determined By Complexity
 - 3-7 Day Period Begins on PO Receive Date
 - Files Must Be Received with PO
 - Add Lead Time For Paint or Special Coating
 - Consult Assurance Sales Dept for Time Frame
